

IF YOU FIND A NEEDLE

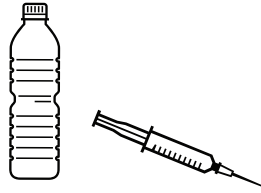

follow these easy steps

1.

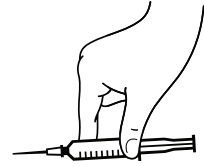

Find a rigid plastic container with a lid.

2.

Place container on the ground next to the needle (do not recap the needle).

3.

Pick up the needle by the centre of the syringe.

5.

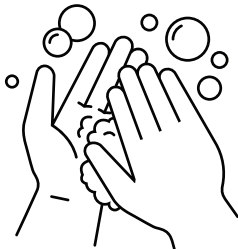

Carefully put the sharp end first in the container (leave the container on the ground, do not hold it).

4.

Point the needle down, away from you.

6.

Wash hand with soap and warm water

7.

Drop off sealed container at local pharmacy, health unit, doctors office, or community drop box
